

# Connect with a larger client base

## AFFORDABLE AND EFFICIENT TRANSLATION SERVICE

Do you want to get in touch with a French speaking community? Do you need a translation from English to French? Don't look any further: the Union des cultivateurs franco-ontariens (UCFO) translation service will help you to offer your agricultural documents to as many farmers as possible.

**There are more than 3 000 French speaking farmers in Ontario and more than 97 000 in all of Canada.** Connecting with a market share that big in the farmers' preferred language gives your communications a lot more impact and outreach.

Spread the word and save: if the UCFO completes a translation contract with a client you referred, you will obtain a **25 % price reduction** on your next translation! Discounts based on frequent translation are also possible.

The UCFO's service is reliable and specialized in agriculture but is, most of all, affordable. Counting on experienced translators, the UCFO can translate all your documents for as little as \$ 0.26 per word in 3 business days for documents of less than 2000 words and in as little as two business weeks for documents of 5 000 words. For more urgent or complex projects, we will gladly try to find the ideal solution to meet your needs!

In addition to this service, the UCFO, through its privileged contacts within the French speaking farming community, can also provide interesting visibility options for your documents. Whether through the *Agricom* newspaper, its social media or its network of partners, our goal is to expand the amount of resources in both official languages.

We look forward to working with you!

*"We have been using the UCFO's translation service since June 2013 and we are very satisfied with their level of professionalism and reliability. They are helping us meet the need for better communication with our French speaking farmer-members. We would recommend others use this service."*

*"We've had great experiences and we appreciate the fast turnaround on some projects."*
